"Mercury 1960"—created for Mercury Division of Ford Motor Company, by internationally-known sculptor Marshall Fredericks—is the first new sculpture of this mythical figure in more than a century.
You'll be glad you bought a Mercury... every time you look at it
Every inch of Mercury is new. Every line is a "go" line—pure, honest, clean. No clutter of useless chrome. There's dramatic new simplicity—new beauty all around—with fabulous Sleek-Line styling.

... every time you ride in it
Mercury's Road-Tuned wheels are the greatest ride advance in a generation. Here's why:

... every time someone has to sit in the middle
There's real comfort for six people, not four. The clumsy center hump you find in other cars has been cut way down. There's plenty of head room, shoulder room, leg room for all.

... every time you look inside
The 1960 Mercury offers you DELUXE INTERIORS AT NO EXTRA COST in every distinctive model, even in the low-priced Monterey series.

And Mercury has a low price for 1960. Sure, you may save a few pennies a day if you buy a car with a "low-price" name, but once you've driven a Mercury anything less will be a letdown. Compare Mercury against any other new car in America today. You'll convince yourself: Mercury adds up to more for your money—it's America's first popular-price luxury car.

1960 MERCURY

The Best-Built Car in America Today
Styled for discerning buyers, the 1960 Mercury steps years ahead of the crowd with Sleek-Line styling, passenger-planned comfort and exclusive Road-Tuned ride. Painstaking attention to detail is evident everywhere in this brilliant, new car. And, since Mercury—unlike its competition—shares its body shell with no other car, you ride with distinction. Just looking at this bold, new beauty gives you the urge to sit behind the wheel...to cruise along the highway...to be admired wherever you drive.

YOU’LL BE GLAD

YOU BOUGHT A MERCURY

EVERY TIME YOU LOOK AT IT
The 1960 Mercury features the richest interior fabrics ever offered in a car costing so little. Here is luxury and beauty you'd expect to find only in the highest-priced cars. You sit comfortably, thoroughly relaxed... surrounded by picture-window visibility. Notice the handsomely rugged interior fabrics and vinyls. Never have such high-quality interiors been available as standard equipment in an American automobile so modestly priced. Run your hand over their richness while you rest assured that these durable appointments are as practical as they are beautiful.

YOU'LL BE GLAD
YOU BOUGHT A MERCURY
EVERY TIME YOU SIT IN IT

Montclair 2-Door Hardtop Cruiser
YOU’LL BE GLAD YOU BOUGHT A MERCURY EVERY TIME THE ROAD GETS ROUGH (and on smooth roads, too.)

Even the roughest roads will seem newly paved in your 1960 Mercury. Mercury’s exclusive new Road-Tuned wheels “give” with the bumps—not only up and down, but backward and forward as well. Like a boxer, they “roll with the punch,” lessen shock to give you the smoothest, quietest ride of any car on any road. No other car has such a beautiful combination of wide stance, swept-back front suspension and low center of gravity as the Road-Tuned 1960 Mercury.
Mercury '60 offers you the most comfortable, relaxed driving you've ever experienced. You have more knee room up front, because the instrument panel has been moved forward—yet, controls are within easy reach. The Panoramic Skylight windshield—Mercury's largest ever—lets you see overhead traffic lights without stretching. Near-vertical windshield posts and wider doors make getting in and out of a Mercury extremely easy. Floor tunnel is only half the size of those found in other cars... gives you extra comfort, room for six passengers.

YOU'LL BE GLAD

YOU BOUGHT A MERCURY

EVERY TIME YOU HAVE NEED FOR MORE ROOM

Park Lane Convertible
Only Mercury Country Cruisers offer this exclusive combination of advanced features for 1960: Road-Tuned wheels—the greatest ride advance in a generation; hardtop styling; passenger-planned comfort; giant cargo space; forward-facing stow-away third seat; all-clear loading platform, roll-down rear window and Mercury V-8 engine efficiency. Select the popular Commuter (below) with Economy V-8 engine and your choice of transmission.

Or you may prefer the superb Colony Park (below right), with 310-hp Marauder V-8, Merc-O-Matic transmission, simulated wood side panels, and power-operated rear windows—all as standard equipment. Both are available as 6- or 9-passenger models.

YOU’LL BE GLAD YOU BOUGHT A MERCURY COUNTRY CRUISER EVERY TIME YOU WANT MORE THAN JUST A STATION WAGON
Near-vertical windshield posts make getting into and out of the 1960 Mercury easier than ever. No more banged knees or bumped heads. Entry, exit are a breeze.

Mercury’s chair-high foam-rubber seats allow you to sit in a normal, more comfortable position. Extra-stretch leg room is provided for six adult passengers.

Three-speed Safety Sweep electric windshield wipers—a Mercury exclusive—clear a 5-foot swath, including the middle area which ordinary wipers cannot reach.

Exclusive “Jet Stream” defrosting focuses first on driver’s viewing area of windshield, then quickly clears remaining glass. Conventional defrosters clear slowly from instrument panel up.

Mercury’s instrument panel is positioned forward to provide more knee room, yet all controls are within easy reach of the driver.

YOU’LL BE GLAD YOU BOUGHT A MERCURY

BECAUSE IT’S SUCH A SENSIBLE INVESTMENT

For just pennies a day more than you would pay for cars with low-price names, you can own a car that is more luxurious, comfortable, beautifully styled. Every time you ride in or drive your 1960 Mercury, you will find new things to applaud—to make you proud you own a Mercury. Don’t buy any car until you’ve driven the Road-Tuned 1960 Mercury.

Power Windows. Optional push-button control panel allows driver to raise and lower windows. Optional master control locks out all switches when desirable.

Power Seat. Driver has 4-way control to adjust front seat to any position he finds most comfortable. Switch is conveniently located on instrument panel.

Power Steering* eliminates 88 percent of wheel-turning effort, makes parking as easy as dialing a phone, yet you retain a complete ‘feel of the road’ for safer, more relaxed control.

Power Brakes* reduce required driver braking effort by 40 percent, provide safer, sureer stops even in emergencies. The feeling of security is more than worth its modest cost.

*Standard on Park Lane and Colony Park models; optional on all others.
