It is often said that something outstanding is worth leaving alone. This thought, we feel, applies to the 1983 Buick Electra. The looks, the feel, and the comfort are all pure Electra.

There can be no mistaking the Electra’s elegant good looks, with its vertical grille and formal lines flowing from front to rear deck. There is a quiet, yet firm purpose to Electra’s styling; to produce the most luxurious motorcar offered by Buick.

The Electra Limited, for example, employs discreet slender protective body-side mouldings in contrast to bright rocker panel mouldings to emphasize the long, formal styling. The Electra Park Avenue retains its unique brushed aluminum body side mouldings incorporating its visual hallmark—the styled ventiports. Electroluminescent coach lamps adorn the pillar behind the front doors. There are 10 new colours available.

The Electra Park Avenue, shown here, represents Buick’s idea of uncommon excellence. Note, for example, the standard padded halo vinyl top. It is designed to reveal body colour at the edges for a very luxurious appearance. Standard Soft-Ray tinted glass helps screen out the sun’s rays. Electra Park Avenue sits on standard white-wall steel-belted radials.

The 1983 Buick Electra Park Avenue. Rediscover its many attributes. We invite you to do so at your earliest convenience.
While there is everyday driving, it's safe to say there is no such thing as an everyday Electra. The two examples shown here prove the point. Please take time to inspect these 1983 Buick Electra Coupes on this page and the next.

When you do, you'll find that Electra's standard power-plant is a smooth, quiet 5.0 litre V-8. A new Delco Freedom II Plus Battery, offering more starting performance in a more compact case, is also standard. The standard automatic transmission incorporates an overdrive range, plus a torque converter clutch. The combination of the latter two help lower engine speed at highway cruising speeds, and directly link the engine with the driving wheels. You may select an available 5.7 litre diesel V-8 in place of the standard engine.

The 1983 Buick Electras are, by any measure, automobiles with an outstanding array of standard equipment. Yet, knowing your desire for individuality, you might consider from the list of available equipment, self-sealing tires for greater peace of mind, tungsten-halogen high/low beam headlamps, automatic level control, memory seats, and Electronic Touch Climate Control air conditioning.

Electra. Maintaining its posture as one of the world's outstanding luxury cars. Proof, we submit, that a correct idea deserves to endure.
The pictures on the extreme right should illustrate, beyond a doubt, that the Buick Electra Estate Wagon is the most luxurious station wagon offered by Buick. The exterior, highlighted by the standard roof rack with air deflector, chromed-plated wheels, and vinyl woodgrain trim, clearly says, “Electra”. So does the interior, with standard 55/45 notchback seating in front including two-way power control for the driver’s side.

With luxury like this so prominent, it may surprise you to know that the Electra Estate Wagon is still a practical cargo carrier, with room for 2490 litres (87.9 cubic feet) of carrying space with the second seat down. In thoughtful Electra style, even the tailgate lock is special: it’s electric with remote control.

A 5.0 litre V-8 with an automatic transmission with overdrive is standard. One special feature of this transmission, of interest to wagon buyers, is that it can be held in its third or normal drive range, when necessary, for pulling heavy loads.

The 1983 Electra Estate Wagon. It pulls a lot of weight very elegantly.
The Buick Electra was designed to be a respite from the day’s cares. It was also designed to carry you, refreshed, to whatever leisure appeals to you. As a result, you’ll find a dedication to luxury and comfort everywhere you look inside a 1983 Electra. One small example: a “headlamps on” reminder chime is standard.

You’ll find the comfort of Electra’s front seating to be outstanding. Elegant cloth 55/45 notchback seating is standard in Electra Limited. Carefully finished 50/50 seats, with driver’s side 6-way power control, are standard in Electra Park Avenue. Rear passengers are treated superbly, too, with deeply padded seats for extra comfort.

Once inside, you’ll find the vast array of luxuries and comforts you’d expect from an Electra. Power windows, air conditioning, a digital quartz crystal clock, and a full complement of interior lighting, all standard. In Electra Park Avenue, a Resume Speed Cruise Control and tilt steering wheel are also standard, to make highway travel more enjoyable.

As impressive as Electra Park Avenue’s equipment is, there is an equally impressive collection of available equipment from which to choose.

Electra. One of the fine ways to treat yourself.

### A word about assembly, components, and option equipment in these vehicles.

The vehicles described in this brochure are assembled at various divisions of General Motors Corporation. These vehicles incorporate thousands of different components produced by General Motors of Canada Limited and related companies and their suppliers. From time to time during the manufacturing process, it may be necessary, in order to meet public demand for particular vehicles or equipment, or to meet federally mandated emission and safety requirements or fuel economy guidelines, or for other reasons, to produce vehicles with different components or differently sourced components than initially scheduled.

All such components have been approved for use in our products by General Motors of Canada Limited and related companies and will provide the quality performance associated with our name. Please note that certain option equipment can be ordered only in conjunction with other optional equipment. Also, upgrading from specified standard equipment may be necessary when certain optional equipment is ordered. Ask your sales representative for details.

With respect to extra cost optional equipment, make certain you specify the type of equipment you desire on your vehicle when ordering it from your dealer. Some options may be unavailable when your car is built. Your dealer receives advances regarding current availability of options. You may ask the dealer for information. GM also requests the dealer to advise you if an option you ordered is unavailable. We suggest you verify that your car includes the optional equipment you ordered or, if there are changes, that they are acceptable to you.

All illustrations and specifications contained in this catalogue are based on the latest product information available at time of publication approval. The right is reserved to make changes at any time, without notice, in prices, colours, materials, equipment, specifications and models, and to discontinue models. Some of the equipment shown or described throughout this catalogue is available at extra cost. Check with your dealer for complete availability.
You've changed...we've changed.

In this catalogue you can see what that statement means in changes to our products. Just as important are the changes in our thinking.

To begin with, we exist for you. What you want in a car is not the important thing, it is the only thing.

You have told us you want quality. We have responded with robotics, lasers, space age materials and, more importantly, with human care and we believe these cars are the best we have ever made.

You have told us you want economy. We have responded by giving you a combination of room, comfort and fuel economy which is outstanding in the entire industry worldwide.

You have told us you want lasting value. We have responded by designing quality into our cars in the first place, building reliability into the cars throughout, and then standing behind our products from first to last.

We cannot exist without your approval. And for that reason it is our goal that you will be more satisfied with your General Motors car or truck than the purchaser of any other car or truck made anywhere in the world.

Not only have our cars changed—so has our thinking. It had to.
